Title: CR product range expansion: Introduction of CR (N) 120 and CR (N) 150

To: ALL

In our efforts to continue to expand on the superior reliability, unmatched cost of ownership, and greatest range of solutions for the multistage inline pumps, we are pleased to announce the sales release of CR (N) 120 and CR (N) 150 on April 20, 2009.

Product information and prices:

The CR (N) 120 and CR (N) 150 are multi-stage pumps that will expand the hydraulic range of Grundfos CR pumps to 790 GPM. The new sizes are available in cast iron, and all stainless steel construction.

Manufacturing location and availability:

The standard construction CR (N) 120 & 150 will be assembled and shipped from Fresno, CA with the standard CR lead time. As of April 20, 2009 all inventory will be in place.

These products will soon be added to our website with all specifications, performance curves and repair parts. Be sure to check back soon the Grundfos CR series under products/vertical multi-stage centrifugals.
